

**THE CLIENT**

The client is the Government of Rwanda under the Judiciary Docket.

Its ment to bring together stakeholders such as the Police force, state law office , religious, civil society, Ministry of Justice, the private sector and Foreign Investors.

**Problem Statement**

Rwanda having faced the 1994 genocide, it has faced various set backs in terms of development and healing. After 2002, there has been a spotenious growth in economy.

The 1994 Genocide gave Rwanda a new face of Humaniterian laws. Tribunal courts were set to solve various cases across the country. At the closure of this excercise, everything was left under the Judiciary and this has then put forth a challange in its case dispute. Currently, the Judiciary has plans to expand its current facility. This then puts forth a need to develop one of this facility which I have undertaken as my design project.

**OBJECTIVES**

1. To design a fully functional Court room that enhance efficient Delivery of Judiciary services.
2. Design a court that takes into consideration the site conditions, climate and use of local materials.

**SITE SELECTION**

The site was selected based on the below criteria  
 Proximity to government services  
 Easy acces for the public  
 Great views to the adjacent facilities i.e Kigali memorial Museum  
 Quiet neighbourhood  
 Good terrain  
 Stable Soils.  
 Acarage of 4-20 Acreas

**SITE JUSTIFICATION**

The site is owed by the police department of Rwanda and sits at a close proximity to government institution esp. the Judicial Service.  
 Its easily accessible by the public and at a close range to the CBD

**BRIEF FORMULATION**

**AREA SCHEDULES**

High Courts	18*10 (3 No.)
