

MISSION:

Our mission is to be a key player in the transformation of our built environment, to create an environment that satisfies the highest ideals of the people of Kenya and the continent of Africa. The department shall provide a quality, values oriented, innovative and technically sound training programme focused on the production of socially responsible practitioners in the building arts; by research that addresses critical issues in our environment; and through an advanced and continuously growing technical capability, direct involvement in the resolution of problems in our built environment. The department shall take up its role as a custodian of knowledge about our history and cultures deriving its inspiration from the achievement of the African people over centuries in the domain of architecture"
